

## To prepare a sample of aftershave

**Aim:**

To prepare a sample of aftershave.

**Method:**

1. Using a funnel pour 30 cubic centimetres of mentholated spirits and 3.5 ml of glycerine into a bottle.
2. Shake for one minute.
3. Label the bottle aftershave.
4. Using logger pro and a temperature sensor examine how aftershave has the cooling effect on the skin.
5. See the graph below.
